

FAST FACTS

SUPPLYING EVERYTHING IN OUR POWER

2026

At ENGIE, power isn't just what we deliver – it's what we do.

We identify opportunities across the entire energy value chain and bring forward products and solutions to commercial, industrial, and institutional organizations. Our in-house experts understand your market and focus on what truly matters: reliable operations, predictable costs, and solutions that fit your energy, economic, and environmental goals.

Financial Strength

ENGIE's investment-grade credit rating enables us to transact in wholesale markets with all major third-party developers and suppliers. This translates into a superior level of confidence and a powerful capacity to meet financial commitments.

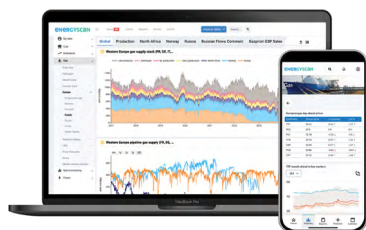

S&P CREDIT RATING **BBB+**

The latest on our portfolio management tools

Digital platform suite (ENGIE 20/20 + EnergyScan) centralizes utility data, automates invoice management, and delivers market insights for smarter energy decisions.

Market-leading platform that centralizes utility and energy data, automates invoice management, and tracks sustainability progress—delivering actionable insights, streamlined reporting, and more informed, sustainable decisions.

EnergyScan is a centralized hub that brings together data, forecasts, and expert insights from ENGIE's global and U.S. teams.
